

BUILDEST II - Developing the Training Schemes and Materials for Non-qualified and Qualified Workforce and Trainers' Training in the Estonian Construction Sector to Achieve EU2020 Energy Efficiency Targets

Project period: 29.09. 2013 – 30.09.2016 (36 months)

The aim of the project: The main focus of the BUILDEST II is on the implementation of activities foreseen in the "Action Plan for Training Workforce in the Estonian Construction Sector" (Roadmap) to contribute to the EU 20-20-20 targets via the development of training schemes, efficient training, and qualification of workers in the construction sector in Estonia, with a special emphasis on energy efficiency.

The project will target training and qualification of the majority of the building workers, both non-qualified and qualified, requiring training by 2020 in Estonia (ca. 16 000 workers out of 41 000). Within the project lifetime, 14 different courses (including training materials) will be developed and a pilot training for the trainers (including piloting the new and upgraded training schemes) will be organised.

Project partners: the project coordinator is Tallinn University of Technology. The partners are: the Ministry of Economic Affairs and Communications, the Foundation Innove, the Estonian Qualifications Authority, the Estonian Association of Construction Entrepreneurs, the Foundation of Heating and Ventilation Engineers Society, and Tallinn University of Technology.

Project is co-funded by the Intelligent Energy Europe Programme of the European Union, the Foundation Innove and partners.
