

Development of the Estonian Continuing Education and Training Roadmap and Action Plan for the Building Sector to 2020 (Buildest)

Project period: 1.11. 2011 – 30.04. 2013

Results of the project:

a comprehensive analysis of the *status quo* of the Estonian building sector on different levels – clarification and description of training and qualification needs, development perspectives in the building sector and the overall legal, political, educational environment with respect to providing energy-efficiency aware and capable workforce; Estonian Continuing Education and Training Roadmap and Action Plan for the Building Sector to 2020 taking into account the results and conclusions of the *status quo* analysis and focusing on energy efficiency knowledge and skills. The Roadmap will contribute to further development of the national continuing education and training programmes and the qualification system of the building sector workers supported by relevant stakeholders and market actors nationwide.

Project coordinator was the Foundation KredEx. The partners of the BUILDEST included: policy-makers in energy efficiency in the building sector (the Ministry of Economic Affairs and Communications and the Foundation KredEx); public authorities to implement the policies (the Foundation Innove under the Ministry of Education and Research); professional employers organisations (the Estonian Association of Construction Entrepreneurs); universities and continuing education institutions implementing the training and education programmes (Tallinn University of Technology).

Project was co-funded by the Intelligent Energy Europe Programme of the European Union, the Foundation Innove and partners.
