

Estonian experience to support Ukrainian vocational education reforms in Volyn oblast

Project period: 01.10.2016- 30.06.2018

The aim of the project: to support the vocational colleges in Volyn oblast and the Ukrainian Ministry of Education to develop the vocational education in the framework of „The Ukrainian Education Strategy until 2021“ and the objectives of the development of VET in the European Union.

The direct objective of the project is to share best practices of Estonia in reforming its vocational education over the period of 20 years to support Ukraina in preparing the workforce for its economy and integration with EU.

The project will make use of the experience of the Estonian VET school directors, key teachers and involved employers in the provision of training for the 6 Ukrainian pilotschool directors and keyteachers, including internships in the Estonian vocational schools.

The project period is 21 months. Upon success the project will serve as a good example for reforming VET in other regions in Ukraine.

Estonian education co operatiron with Ukraine spring 2017
